Small/Medium Manufacturer
(sales less than \$100 million)

Curved Lift & Slide Door **Luxury Windows & Doors,** *San Diego, Calif.*

Bringing a dramatic new style to wide-opening applications, the curved lift & slide door provides a panoramic design and is available with a flush track system that allows virtually seamless indoor/outdoor transformation of a room. When raised, the door glides effortlessly with the touch of a finger.

The lift and slide hardware is capable of handling extraordinarily large panel sizes with ease. Available as a radius pocket system, the door's curved panoramic design uses bent glass products available from foreign and domestic producers. The precision hardware provides smooth operation when combined with the company's exclusive hidden track system. The operating mechanism lowers the door on the dual compression seal at the bottom of the sliding panel creating a weather tight seal. The door also has an automatic opener option.

Precision rollers and guides provide smooth operation for the aesthetically pleasing curved bent glass product line.

Luxury Windows & Doors' curved door features a flush track system for seamless indoor/outdoor integration.
